DAIEK WOODWORKS OFFERS THE FINEST LIFT-AND-SLIDE DOOR SYSTEM HARDWARE FOR SPECTACULAR, OPENABLE WINDOW WALLS USING YOUR CHOICE OF HARDWOODS AND FINISHES.

■ ■
Above: Lift-and-slide systems can satisfy every possible requirement. One or more moveable doors can be installed with no limit on number, as long as they slide on two parallel tracks.
■ ■

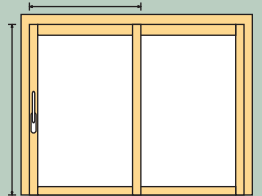

Quality lift-and-slide systems and Daiek Woodworks bring together a higher standard of workmanship and materials for many years of smooth, secure, reliable operation.

- Create spectacular window walls with panoramic views.
- Large panels (up to 10' x 10' and 550 pounds in weight) slide smoothly and quietly.
- When the handle is turned down, panels easily glide open or closed—with just one hand. Turn the handle up, and the panel lowers onto the track—locked, weather-sealed and secure.
- Multiple panels can pocket efficiently into a wall to create a breath-taking opening.
- Offers more options for track and handle finishes, with brass or aluminum exterior cladding possible.
- Compatible with “Green Building” architectural goals for natural light and ventilation.
- Can also be used for windows.

Make your grandest vision a reality. Open a world of possibilities with precision lift-and-slide hardware systems and the craftsmanship of Daiek Woodworks.

▲ Minimum panel size: 31-1/2" wide, 22" high

▲ Maximum panel size: 9'8" wide, 10'10" high

Above: Lift-and-slide hardware systems come in two sizes to support sliding panels up to 330 pounds or 550 pounds. Each of the sliding panels can be custom-built up to a recommended maximum of 9' 8" wide x 10' 10" high. Multiple panels can be combined to cover very large openings.
