Above: Daiek Woodworks built the shutters, the custom moldings and built-in storage, the custom Mahogany cabinetry and the ceiling beams that conceal the overhead lighting in this game room. The combination of beautiful wood, excellent joinery, detailed moldings and fine finishes represent an extraordinary example of fine custom millwork.

Excellence in custom millwork is something that clients have come to expect at Daiek Woodworks. Our continuing investment in new software and computerized equipment results in an uncompromising level of craftsmanship and quality in millwork, including:

- Match existing molding or create new
- Grind knives
- Large existing profile selection
- Sand all flat stock
- Meet AWI standards for custom or premium grade
- Onsite templating for profile
- Expertise to help facilitate engineering
- Experience to engineer compound and complex moldings
- Presort/preselect lumber for defects (bow, cup, twist)
- Lumber defect culling before and after
- Crowns, cornices, sidings, floorings
- Any profile for any application

**At Daiek Woodworks, we're committed to quality, dedicated to communication, follow-through, problem-solving and the achievement of everyone's goals.**

Above (top): As specialists in fine architectural millwork, the Daiek shops have all the right tools and skill, including grinding knives for custom profiles.

Above: The new Daiek shop enables greater productivity and provides the space needed for simultaneous production of large projects.
